## iOS Mobile App Developer

### Job Description

Mainblades Inspections is on a mission to change the way inspections are performed for large commercial aircraft. Our company develops data-driven technology, focused on automation of the complete inspection process: from autonomous drone flight, to damage detection and assessment of visual data, all the way to automated reporting. Our automated drone inspections for aircraft allows for a more rapid and effective inspection on any location, enabling our customers to *keep their aircraft off the ground*.

We are looking for a iOS Developer and in this role you will:

- Implement and maintain our mobile app, components and tools part of our mobile product offering.
- Dedicate yourself to testing, checking code quality, reviewing other people's code and compiling documentation.

You will work in our software engineering team, which is primarily focused on development of autonomous navigation using drones and image recognition using deep learning. Working at our company means working within a professional, dynamic and complex environment and as a team we are responsible for delivering a high-quality product.

### Requirements

#### What you bring to the table

You have to be a true team player. You speak up, are transparent and not shy to stand up for your own opinions. You enjoy sharing knowledge and continuously improve yourself and the team.

Minimal requirements:

- Software development experience with Swift and Objective C.
- Have a sharp eye for UX/UI.
- Proficient in full cycle iOS development (show or tell us what you did!).
- Release management and making Apps available in the App stores.
- New and best practices in IOS development.
- Integrating REST based webservice.
- Top-notch programming skills and software engineering know-how, and a desire to keep learning.
- Have worked with a team (you know Scrum and can't live without version control).
- Good command of the English language (both spoken and written).
- Are a resident of the EU, or have a Dutch Working permit and are willing to move to the Netherlands.

Big pluses:

- BSc or MSc in Computer Science.
- Experience in a startup or scaleup.
- Experience with SaaS/technology products & services.
- Ability to write clean, elegant and maintainable production-level code.
- Architectural experience.

---

## What we bring to the table

*A comfortable and fun working environment:*

- Unique chance to be part of a high-growth, successful start-up.
- You can have a real impact on the business.
- Freedom to create your own career path, with plenty of opportunities to grow.
- Competitive salary.
- Covered travel expenses.
- Annually 30 paid holidays.
- Good coffee! Alternative drinks also available.

## Up for the challenge?

If you think you got what it takes, and you are up for the challenge, take the first step and apply now!  
If we're interested, we'll reach out and take you through our recruitment process.
